		SERVICE INTERVALS	
	12 months / 10,000 miles, whichever comes sooner		12 months / 20,000 miles, whichever comes sooner

*Range figures are determined according to the standardised EU measurement procedure (WLTP). Individual driving style and other factors, such as speed, outside temperature, topography and the use of electricity-consuming devices/units, have an influence on the real life range and can possibly reduce it.

**In order to achieve the maximum charging speed, an electric vehicle charger that delivers at least 3.3 kW of electricity must be used. Actual charging speed and charging time may be influenced by the battery temperature and weather conditions.
